FEEDBACK

#### Part Number TTP100007 - Total Phase EEPROM Socket Board

The EEPROM Socket Board by Total Phase provides an easy and most-effective way to program I2C- and SPI-based memory devices. The board is designed to work with Flash Center software (free download) and an Aardvark I2C/SPI Host Adapter (TTP100005) or a Cheetah SPI Host Adapter (TTP100004).

Different devices may have different pin configurations. For maximum flexibility, the EEPROM Socket Board provides stubs for each of the pins and each of the signals. Using the included 8-pin ribbon cable, users can easily connect the appropriate source to each pin of the target device.

- Flash and burn I2C and SPI Serial EEPROMs and SPI Flash memory
- Supports these standard chip packages: DIP8, 80IC8, and TSSOP8
- Specify 5V, 3.3V, or an external VDD source at any voltage level
- Download free Flash Center software at <http://www.totalphase.com>

Total Phase is a trusted 3rd Party Tool Provider
