Part Number EVB-LAN9220-MINI - LAN9220 High-Performance 16-bit Small Formfactor 10/100 Ethernet Controller Eval

The LAN9220 is a full-featured, single-chip 10/100 Ethernet controller designed for embedded applications where performance, flexibility, ease of integration and system cost control are required. The LAN9220 includes an integrated Ethernet MAC and PHY with an SRAM-like slave interface. The simple, yet highly functional host bus interface provides a glue-less connection to most common 16-bit microprocessors and microcontrollers. This MINI board enables developers to connect directly to a host bus via a standard connector.
(Not Returnable/Cancelable)
